

Addendum to EduCare 5.0's Mission and Vision statement

In light of recent developments within our network, we, the undersigned partners, jointly acknowledge and agree to the following amendment to the Mission Statement originally signed in 2024:

Due to reasons beyond our control, one of the original signatory partners, the Medical University Lublin, has formally withdrawn from the partnership as of 10 October 2025.

We hereby welcome the **Medical University of Łódź (UMED)** as a new partner within the **EduCare 5.0 European University Alliance**. UMED is one of Poland's leading medical universities, internationally recognized for its excellence in health education, patient-centered research, and innovation in digital healthcare solutions. Their expertise aligns closely with EduCare 5.0's mission to strengthen interdisciplinary collaboration, foster innovation in education and care, and address the evolving challenges of healthcare delivery in Europe. As a distinguished institution from Poland, a country with a significant and growing role within the European Union, UMED brings added strategic value, expanding our network's reach and reinforcing our engagement within the broader European context.

The inclusion of UMED follows a thorough evaluation by the network partners, who identified UMED's strong commitment to international collaboration, digital health education, and applied research as valuable assets that will enrich and strengthen the EduCare 5.0 Network. By joining EduCare 5.0, UMED brings a proven track record of integrating education, research, and innovation, the core pillars of our network, while expanding our geographical and disciplinary reach.

This addendum ensures continuity, renewal, and a shared commitment among all partners, reflecting the evolving nature of our collaboration and our collective ambition to deliver long-term impact through the EduCare 5.0 mission and vision.

The EduCare 5.0 partners
